

Guidehouse Defense

Guidehouse is a leading management and technology consulting firm serving the public and commercial markets. Guidehouse combines deep commercial and public sector expertise to help clients solve the unique societal challenges of our time. Across a range of advisory, consulting, outsourcing, and technology/analytics services, we help clients create scalable, innovative solutions that prepare them for future growth and success.

Here's what defines Guidehouse Defense:

1. **We help our clients address their most complex challenges:** We partner with our Defense clients to solve their toughest challenges, combining our in-depth understanding of the Department of Defense (DoD) mission with a relentless focus on quality to develop sustainable strategies that drive mission success.
2. **We are values-driven:** We are a team with skin in the game. Our clients' success is our success, and we work tirelessly to ensure that the strategies and solutions we develop together strengthen their ability to support their mission.
3. **We deliver high quality work:** Our professionals do what it takes to complete the job well and make our clients successful.
4. **We act as true partners with our clients and industry:** We work hand-in-hand with clients to develop and implement measurable, meaningful, and sustainable improvements that position them, and their organizations, for success.
5. **We connect leading practices with deep mission insight:** Our professionals leverage experience gained from work with the DoD and in commercial industry, bringing the insight, capabilities, and cultural acumen required to develop well-thought-out, sustainable solutions.
6. **We take an enterprise view:** We bring unique perspectives learned through decades of expertise with the DoD. We leverage a comprehensive, enterprise wide view to develop and enable processes and strategies that positively impact the enterprise as a whole

Readiness and Affordability

We execute an integrated approach leveraging deep mission insights, data scientists, engineers, maintenance experts, and supply chain managers to reduce the cost of sustainment and improve readiness.

- Mission-driven analytics
- Supply chain management
- Design for affordability
- Total ownership cost reduction
- Independent, integrated program reviews
- Component-level diagnostics and component find-fix teams using 12 Integrated Product Support elements

Advanced Analytics & Intelligent Automation

Guidehouse's 200-plus data analytics experts help transform immense data sets into actionable intelligence.

- Business intelligence and data analytics
- Data Governance and Enterprise Data Management
- Data Strategy, Architecture, and Engineering
- Advanced Visualizations
- AI and Intelligent Automation Strategy including robotic process automation (RPA)

Technology

We help our DoD clients maximize the return on their information technology investments through the alignment of their business processes and architecture with a technology-agnostic decision framework. We assist with the creation and management of world-class technology solutions, incorporating security, data management, risk management, and an eye toward a forward-looking, agile architecture through:

- Business systems alignment and rationalization.
- Application and infrastructure modernization, including open architecture principles, planning, roadmap development, system evaluation, and enterprise application/system integration.
- Secure cloud migration utilizing DevSecOps.
- Change management, culture change, strategic communication, and training.
- Audit, compliance, controls, and policy.
- Acquisition and contract strategy and planning.
- Portfolio, program, and project management.
- IT function effectiveness and efficiency optimization; organizational authorities.
- Open source intelligence to include technology trends and cyber threats.

ClearanceJobs®

Cybersecurity

- Our team is composed of experts in cybersecurity and enterprise risk management who address the most difficult cybersecurity challenges faced by our nation. We are trusted advisors to senior executives and information security professionals in organizations across the commercial and public sectors.
- Strategy and security architecture development and analysis to improve current cybersecurity programs
- Cyber resilience to identify and reduce the organizational and mission impact(s) of cyber-related risk
- Incident prevention and response assessing security controls implementation and providing post-breach services to ensure an effective response
- Identity, Credential, and Access Management (ICAM) providing tailored solutions for the full ICAM life cycle
- Data Protection and Privacy assess, build, enhance, and maintain data protection and privacy programs
- Risk Management Framework (RMF) implementation, including independent verification, mitigations, and critical project recovery
- Supply Chain Risk Management (SCRM), supply chain illumination, industrial base analysis, open source due diligence, and strategic sourcing

Energy, Sustainability, and Infrastructure

Our solutions help solve big challenges by combining deep domain expertise, market research through Guidehouse Insights, and advanced technology capabilities to provide breakthrough innovation.

- Science-based targets and decarbonization plans
- Transition, training, and change management
- Fleet electrification
- Renewables portfolio optimization and management
- Industrial control systems cybersecurity
- Utilities privatization
- Installations as smart cities
- Climate resilience and energy security resilience
- Infrastructure and energy optimization post-COVID

Financial Management

We help DoD address accounting, auditing, reporting, and systems and internal control challenges and impediments.

- Auditability and financial improvement
- Financial reporting and internal controls
- Cost estimation
- Property and asset visibility and accountability
- Planning, Programming, Budgeting, and Execution (PPBE)

Program Management

Guidehouse provides the tools, methodologies, and people to ensure successful delivery of large programs.

- Program and Project Management Office (PMO) design and implementation
- Organizational, program, and project management assessment
- Project portfolio management support services
- Feasibility and business case development and monitoring
- Acquisition management support
- Performance assessment and benefits realization

Human Capital

Guidehouse works with the Federal government to help meet 21st century workforce challenges.

- Change management
- Strategic workforce planning and organizational design
- Talent management and learning and development
- Knowledge management

Relentless Focus on Quality:
