

TEKSOUTH

www.teksouth.com

WHO IS TEKSOUTH?

Teksouth is a Business Intelligence and Data Analytics company, that created, built and sustains the largest and longest running financial analytics tool in the Air Force, and we saved them \$105M in just one year.

LEADING CLIENTS FORWARD

We deliver practical and efficient solutions that combine technology with professional and managed services to answer your most pressing information challenges.

In the world of data integration, warehousing, and business analytics, “one-size-fits-all” seldom does. There is a significant difference in needs and complexity between a program office and a command.

Teksouth offers solutions for each through its Dashboard Analytics and EntelliFusion solutions.
