

BDO KNOWS TEAM REDSTONE

GET TO KNOW BDO PUBLIC SECTOR

BDO Public Sector serves the federal, state and local government across many levels of federal civilian, defense and intelligence agencies. Drawing upon our deep experience to provide strategic, innovative solutions, BDO helps government leaders develop and implement tailored strategies that make the most of their limited resources.

BDO's cross-functional team of public sector professionals has worked with multiple military branches and agencies, along with numerous other organizations within the federal government. Whether you need assistance with your audit and compliance, strategic readiness, cybersecurity, or digital transformation, we've got you covered.

BDO and our affiliates have over 100,000 people world-wide, and 70+ offices in the U.S. including our offices across **Huntsville** and the **Greater Washington DC** area, where our public sector footprint is most significant.

OUR ROCKET CITY PRESENCE

The BDO Huntsville office has a proven track record for assisting Redstone Arsenal's tenant organizations with their most pressing challenges, be it the improvement of financial operations and auditability through the redesign of business processes or the design and implementation of technological solutions, all in a combined effort to achieve mission success.

OUR SERVICE OFFERINGS

Audit Readiness & Sustainment

Identify impediments to financial statement auditability; develop corresponding corrective actions and remediation plans; and implement solutions and sustainment plans across your enterprise.

Financial Management

Focus on the key intersection of financial and budgetary management, information technology, and operations to assess and improve your financial management processes.

Process Optimization

Evaluate processes and procedures with an eye on optimizing efficiency and effectiveness through the implementation of best practices.

Risk Identification and Mitigation

Identify, manage, and effectively mitigate your enterprise-wide risks to support mission success.

Data-Driven Decisions

Harness the power of your data to provide actionable insights and enhance decision-making in support of mission objectives.

Technology Implementation

Improve the efficiency, effectiveness, and interconnectedness of your operations by replacing outdated and siloed systems with cutting-edge integrated technology solutions.
